

3. Application

This Bulletin applies to all Barbadian vessels.

4. Introduction

- 4.1 As per SLS.14/Circ.115 the BMSR concurs that in various SOLAS regulations the words "exemptions", "relaxations", "dispensations", and "waivers" are used with apparently no intended difference in their meaning.
- 4.2 A Permit is a temporary release from a statutory requirement for a limited time period where a vessel is, temporarily, unable to comply with statutory provisions and are generally limited to the minimum period of time necessary for the vessel to reach a port where rectification of the deficiency can be accomplished. This includes extension and/or postponement of statutory surveys, audits, verifications, and inspections.
- 4.3 An Exemption is a permanent release from compliance with a statutory convention requirement, due to the existence of specific circumstances as sanctioned by the provisions of that Convention.
- 4.4 An Equivalence is a permanent arrangement which provides the same general level of safety or intent of a Convention requirement without meeting all criteria for full compliance. Such arrangements can be accomplished, either independently or in combination with, alternative equipment, additional procedures/precautions, operational restrictions, etc.
